

Abstract

5 The present invention relates to crosslinked, water-soluble or water-dispersible polyurethanes of

- 10 A) at least one water-soluble or water-dispersible polyurethane prepolymer having terminal isocyanate groups of
- a) at least one compound having a molecular weight in the range from 56 to 300 which contains two active hydrogen atoms per molecule,
- 15 b) at least one polymer containing two active hydrogen atoms per molecule,
- c) at least one compound which contains two active hydrogen atoms and at least one ionogenic or ionic group per
- 20 molecule,
- d) at least one diisocyanate,
- 25 B) at least one polymer containing groups which are reactive toward isocyanate groups, chosen from hydroxyl, and primary and secondary amino and/or carboxyl groups,
- 30 or the salts thereof.
